WHAT DO I DO IF MY PLANT ISN'T GROWING AS IT SHOULD?

Do not immediately dig the plant up. Please remember that plants are living things with natural flaws and imperfections, so please contact a nursery associate for possible solutions. In some cases, certain plants can go through a period of transplant shock when going into new soil and will most likely recover if the proper steps are taken to fix the problem.

WE WILL HAPPILY ANSWER QUESTIONS CONCERNING PLANTING, WATER CARE AND MAINTENANCE OF PLANTS.
